

# STORM WATER POLLUTION PREVENTION & SEDIMENT CONTROL

## TRITON™ CATCH BASIN FILTER INSERT

### REM TRITON™ Catch Basin Filter Insert

Catch Basin Insert with Easy-to-Maintain Filter Insert

The TRITON™ Catch Basin Insert is designed to be inserted in a catch basin below the grate of storm drain inlets.

The TRITON™ Catch Basin Filter Insert has been developed to help eliminate hydrocarbons and other contaminants such as antifreeze, metals, sand, silt, and litter from storm water runoff.

The TRITON™ Catch Basin Filter is also used post-construction to replace the GEO-TRAP™ series (used during pre-construction for sediment and dust control).

US Patent No. 6,217,757

See Back For Details

Meets Best Available Technology (BAT's) for Use in Storm Water BMP's (Best Management Practices).

Servicing of Filters on a Regular Basis is a Requirement to Meet Local and State BMP's.

### PRODUCT SPECIFICATIONS:

- Constructed from high density polyethylene plastic with UV inhibitors.
- Non-Reactive High Density Polyethylene Plastic Construction with UV Inhibitors
- Round, Square, Rectangular and Custom Models Available
- Easy-to-Install in New and Existing Storm Drain Inlets
- Patented Design Includes High Nominal Flow and High Overflow Capacities
- Easy-to-Maintain Filter Insert Allows for Quick and Easy Servicing
- Filter Insert Includes a Replaceable Media Cartridge for Removal of Hydrocarbons, Metals, Antifreeze, Sand, Silt, and Litter
- Filter Media is Non-Hazardous and Meets EPA and OSHA Standards

### Maintenance Contracts Available

**Spent Filter Media is Considered Hazardous Waste and Must Be Properly Disposed to Meet EPA and OSHA Standards**
